

## ShipEngine for your SIIA ShipHost Module

Your SIIA ShipHost module uses the ShipEngine platform to process your shipment and print the shipping labels. A ShipEngine account is required in conjunction with SIIA ShipHost regardless of whether you have software accounts with other shippers or shipping processing systems.

To assist in getting the process started with ShipEngine, here are links to their Pricing and Contact Us pages.

### Pricing

ShipEngine has three plans:

- *Free* – This is a pay-as-you-ship plan using ShipEngine’s discounted carrier rates if you don’t already have good carrier relationships.
- *Advanced* – Starts at \$75/month for printing 1,000 shipping labels. Quantity discounts can move the per-label cost down to \$.06. Use your own carrier accounts. This is what most customers start with.
- *Custom* – For companies with over 25,000 shipments a month.
